**Student-Centric Methods Used For
Enhancing Learning Experiences
(2022-23)**

Student Centric Methods

The student-centric approach aims to provide a classroom environment in which students can learn to think critically and solve real-world problems. It is one of the best ways to prepare learners for the future and has led to an increase in experiential, participative learning, and problem-solving methods.

EXPERIENTIAL LEARNING

Experiential learning is the process of learning through hands-on experience. The main idea behind the phrase experiential learning is building upon what one knows to expand that knowledge into action. Experiential learning is one of the most beneficial types of learning because :

- It can allow students to immediately apply things they are learning to real-world experiences.
- It allows students to practice teamwork.
- It allows students to better retain information.
- Students can greatly benefit from learning that helps them prepare for the real world.

Some Glimpses

PROBLEM-SOLVING METHOD

Problem-solving method is the process of identifying an existing problem, determining the root cause or causes of the problem, deciding the best course of action to solve the problem, and then finally implementing it to solve the problem. The college encourages the students to gain and increase problem-solving skills and motivates them to participate in various activities like field studies, project work, etc. and submit report of the same.
