## 2. PEER TEACHING FOR SLOW LEARNER

Department of Zoology, Gargaon College conducted peer teaching methodology for slow learner for improvement of their learning processes. In peer teaching the teachers of the Department assign a particular topic to a selected student from advanced learner and given the topic in advance to prepare for the class. It is mostly a repetition of topics taken in class. The student plays the role of a teacher and takes the class, understanding the mindset of the class. Students also imbibe better ideas from a peer. In this practice a student who has effectively grasped the topic under discussion, instructs and teaches the rest of the class. This proves beneficial to both the learner-student and the teacher-student. The slow learner able to grasp when explained by a peer, and the advance learner's knowledge increases through revision of the topic before imparting to the peer. Such a direct interaction between students, promotes active learning as well as participation within themselves. Student's teachers enhance their own depth of knowledge in the topic by instructing others. Advanced learners are usually chosen to head these teaching sessions with support from the teacher as and when necessary.
