

STUDENT SEMINAR

Department of Chemistry

Student seminars play a pivotal role in academic development, fostering a dynamic learning environment that extends beyond traditional classrooms. These events provide students with a platform to showcase their research, hone presentation skills, and engage in intellectual discourse. The act of preparing and delivering a seminar enhances communication abilities, critical thinking, and research proficiency. Additionally, seminars promote a culture of knowledge sharing, encouraging students to explore diverse subjects, stay informed about contemporary issues, and cultivate a spirit of curiosity. Attending seminars exposes students to varied perspectives, expanding their horizons and contributing to a well-rounded education. Moreover, the feedback received during seminars facilitates constructive growth, encouraging students to refine their ideas and academic approaches. In essence, student seminars are a cornerstone in the holistic development of individuals, nurturing a community of informed, articulate, and intellectually vibrant learners. We, at our department also encourage the student attendees to ask questions, to embed inquisitiveness among the student fraternity.

Every semester, seminars are organised among the students of every semester.
