Notice

Date: 4.04.2024

The Geography Department is pleased to announce that a “A TALK ON CAREER PROSPECTS IN GEOGRAPHY ” is to be held on 6th April 2024. All students of the Department of Geography are informed to actively participate in this program. The competition is scheduled for 10 am in the Department of Geography, at Gargaon College.

Dr. Dilip Kumar Deke
Associate Professor & HO
Dept. of Geography
Gargaon College

**HoD,
Department of Geography
Gargaon College**

Rationality of the Programme

The rationale for the "**Career Prospects in Geography**" class talk lies in the imperative to illuminate students about the multifaceted landscape of career opportunities inherent within the discipline of geography. By elucidating the breadth and depth of professional pathways available, the program seeks to instill in students an appreciation for the practical relevance of geographical knowledge across diverse sectors. Through an examination of various career trajectories and roles, the presentation aims to empower students with actionable insights that transcend traditional academic boundaries, thus enabling them to make informed decisions regarding their future career paths. Moreover, by fostering a deeper understanding of geography's applicability in addressing contemporary societal challenges, the program endeavors to cultivate a sense of purpose and relevance among students, thereby contributing to the cultivation of a more geographically literate and socially engaged workforce.

Brief Report of the Programme

The program commenced with Dr. Dilip Kumar Deka, Associate Professor, Department of Geography, Gargaon College, sharing his expertise and experiences with the eager audience. Dr. Deka elaborated on various career paths within geography, emphasizing the versatility and breadth of opportunities available to aspiring geographers. He highlighted the importance of geographical knowledge in addressing pressing global issues such as climate change, urbanization, and resource management.

The event, hosted by the Geographical Forum in collaboration with the Department of Geography, witnessed active participation from students, and faculty members alike. Dr. Deka's engaging presentation captivated the audience, prompting insightful discussions and queries regarding career prospects and educational pathways in geography.

Students were informed about a detail-oriented career that involves collecting and verifying geographical information in the field and an office. Additionally, they learned about the role of an Environmental Consultant, a popular job that involves advising real estate companies, businesses, and government departments on environmental issues. Moreover, students gained insights into the career of a Landscape Architect, which entails studying a location's natural geography and integrating man-made patterns with the environment. Furthermore, they explored the opportunities in the field of Surveying, which offers good prospects and excellent opportunities for progression, both domestically and internationally. Lastly, students were introduced to the role of an Urban Planner, which involves designing land use plans, analyzing demographic trends, assessing environmental impacts, and recommending policies for sustainable development. They also learned about careers as Geographical Information Systems Officers and GIS Specialists, which involve using geographic information systems to analyze geographical aspects and create maps for complex readings and many more career paths were being discussed.

In his closing remarks, Dr. Deka expressed gratitude to the organizers for facilitating such an enriching session and encouraged students to pursue their passion for geography with determination and enthusiasm. The program concluded on a high note, with participants expressing newfound inspiration and clarity regarding their future career paths in geography.
