

REMEDIAL CLASSES FOR SLOW LEARNERS

DEPARTMENT OF STATISTICS

SESSION: 2023-24

Name of the Programme: Remedial classes for slow learners

Session: 2023-24

Venue: Department of Statistics

Brief report of the program

This is an alternate approach for the regular classroom teacher in instructing the slow learners. Remedial teaching is the use of activities, techniques and practices to eliminate weakness or deficiencies the slow learners have. Deficiency in basic statistical skills can be reduced or eliminated by re-teaching the constent that was not learned earlier. The instructional environment does not change, as in the company approach. Conventional instructional technique such as repeated practice is employed.

Remedial classes focus on basic concepts of developing better study habits (preparing notes etc.) and to develop confidence in the students. Remedial classes help students to close the gap between what a student knows and what he is expected to know.
