2. Environment related papers: Course Code: BC409T Core Course IX: Plant Ecology and Phytogeography Semester: 4th Sem (H)

Course: Generic Elective Title of the Paper: Plant Ecology and Taxonomy Semester: 4th Sem (GE)

Generic Elective	
II. Plant Ecology and Taxonomy The objective of this course is to expose the students to interaction surroundings and also to identification, classification and nome	n of plant life with the enclature of plants
(Credits: Theory-4, Practical-2) THEORY	
Lectures: 60	
Unit 1: Introduction	(2 lectures)
Unit 2: Ecological factors	(10 lectures)
Soil: Origin, formation, composition, soil profile. Water: States of wa precipitation types. Light and temperature: Variation Optimal and limiting tolerance. Adaptation of hydrophytes and xerophytes	ater in the environment, g factors; Shelford law of
Unit 3: Plant communities	(6 lectures)
Characters; Ecotone and edge effect; Succession; Processes and types	(0 1001/00)
Unit 4: Ecosystem Structure; energy flow trophic organisation; Food chains and food webs, Eco production and productivity; Biogeochemical cycling; Cycling of carbon,	(8 lectures) ological pyramids nitrogen and phosphorous
Unit 5: Phytogeography	(4 lectures)
Principle biogeographical zones; Endemism	
Unit 6: Introduction to plant taxonomy Identification, Classification, Nomenclature.	(2 lectures)
Unit 7: Identification	(4 lectures)
Functions of Herbarium, important herbaria and botanical gardens of Documentation: Flora, Keys: single access and multi-access	the world and India;
Unit 8: Taxonomic evidences from palynology, cytology, phytochemis	stry and molecular data. (6 lectures)
Unit 0. T	
Unit 9: Taxonomic hierarchy Ranks categories and temperatures	(2 lectures)
Ranks, categories and taxonomic groups	
60	

CBCS Undergraduate Programme, 2018 : Botany Honours (Last updated: 08-04- 2019)

Unit 10 Botanical nomenclature

(6 lectures)

Principles and rules (ICN); ranks and names; binominal system, typification, author citation, valid publication, rejection of names, principle of priority and its limitations.

Upit 11 Classification

(6 lectures)

Types of classification-artificial, natural and phylogenetic. Bentham and Hooker (upto series), Engler and Prantl (upto series).

Unit 12 Biometrics, numerical taxonomy and cladistics (4 lectures) Characters; variations; OTUs, character weighting and coding; cluster analysis; phenograms, cladograms (definitions and differences).

Practical

- Study of instruments used to measure microclimatic variables: Soil thermometer, maximum and minimum thermometer, anemometer, psychrometer/hygrometer, rain gauge and lux meter.
- 2. Determination of pH, and analysis of two soil samples for carbonates, chlorides, nitrates, sulphates, organic matter and base deficiency by rapid field test.
- 3. Comparison of bulk density, porosity and rate of infiltration of water in soil of three habitats.
- 4. (a) Study of morphological adaptations of hydrophytes and xerophytes (four each).
 (b)Study of biotic interactions of the following: Stem parasite (*Cuscuta*), Root parasite (*Orobanche*), Epiphytes, Predation (Insectivorous plants).
- 5. Determination of minimal quadrat size for the study of herbaceous vegetation in the college campus by species area curve method. (species to be listed).
- 6. Quantitative analysis of herbaceous vegetation in the college campus for frequency and comparison with Raunkiaer's frequency distribution law.
- 7. Study of vegetative and floral characters of the following families (Description, V.S. flower, section of ovary, floral diagram/s, floral formula/e and systematic position according to Bentham & Hooker's system of classification):Brassicaceae Brassica, Alyssum / Iberis; Asteraceae -Sonchus/Launaea, Vernonia/Ageratum, Eclipta/Tridax; Solanaceae -Solanum nigrum, Withania; Lamiaceae -Salvia, Ocimum; Liliaceae Asphodelus / Lilium / Allium.
- Mounting of a properly dried and pressed specimen of any wild plant with herbarium label (to be submitted in the record book).

Course Code: GECBOT 1 Title of the Course: Natural Resource Management Semester: 2nd Sem

Title of the Course: Natural resource managementCourse Code: GECBOT 1Nature of the Course: Generic Elective Course-ITotal Credits: 03Distribution of Marks: 80 (End Sem) + 20 (In-Sem)

COURSE OBJECTIVES: The objective of this course is to provide knowledge to the students on importance, sustainable utilization, conservation and management of natural resources.

II Sustainable utilization of land and water resources; Soil degradation and management; water resources and their management. Renewable and non-renewable sources of energy. 12 01 - 13 III Forests: Definition, Significance; Types of vegetation in India; NTFC Depletion and Management, JFM. 08 02 - 10 III Forests: Definition, Significance; Types of vegetation in India; NTFC Depletion and Management, JFM. 08 02 - 10 IS MARKS Contemporary practices in resource management: EIA, GIS, Participatory Resource Appraisal, footprint, Resource Accounting; Waste management. National and international efforts in resource 10 03 - 13	UNITS	CONTENTS	L	Т	Р	Total Hours
